

**QSE - Quality, Safety and Environmental policy**

Through its experience, BIAR SA has positioned itself as one of the global leaders in the field of sampling valves for the chemical, petrochemical and pharmaceutical industry.

The quality of our products and services, the assurance of safety and health towards our employees as well as the control over our environmental footprint are all key factors to the sustainability of our activity.

To address those challenges, we set the following objectives :

**In terms of quality :**

- To offer a customer service provided by expert advisors.
- To provide a superior quality of products and a reliability worthy of the Swiss Made label.
- To guarantee the availability of spare parts for more than 10 years.

**In terms of health and safety :**

- To develop a safety culture, aiming towards the zero accident objective.
- To prevent occupational illnesses.
- To reduce risks at the work place.
- To prevent major crises.
- To involve the employees with the definition and implementation of preventive measures.

**In terms of environmental protection :**

- To reduce the impacts on climate change.
- To prevent environmental impacts.
- To promote energy efficiency.

It is the responsibility of each employee to comprehend and engage daily in the quality, safety and environmental policy, in a dynamic of action and continuous improvement.

As members of the board of directors, we commit ourselves to providing the necessary resources to our departments, in order to reach those goals in compliance with the legal regulations.
